

# Microsoft Project Server 2013 Workflow Management

Course Outline

## Introduction

This two-day course is for individuals tasked with setting up, building and deploying workflows within the SharePoint and Project Server 2013 environment. Students will learn how to install and configure the necessary workflow components including Workflow Manager 1.0. This course will also cover using SharePoint Designer and Visio 2013.

## Audience

This course is intended for administrators, SharePoint administrators and other IT resources who will be responsible for the setup, configuration and maintenance of workflow within the Project Server 2013 environment.

## At Course Completion

After completing this course, students will be learn about and be able to:

- Project Server Workflow Overview
- Working with SharePoint Designer 2013
- Building workflows for Project Server 2013
- Using Visio 2013 and SharePoint Designer 2013
- Deploying Workflows with Project Server 2013

## MPS13-Workflow Management

Days of Training: 2

### Overview

This course is for individuals responsible for setting up, developing and deploying workflows within the Project and SharePoint Server 2013 environment. Students will learn about the necessary components required to deploy workflow both within the Project Server and SharePoint environments.

### Prerequisites

To ensure your success, we recommend you have some working knowledge of Enterprise Application servers, TCP/IP, IIS, SQL Server 2008/2012 and Windows 2008/2012 Server. We also recommend the Project Server 2013 for Administrators course.
